ELSEVIER International Journal of Mass Spectrometry and Ion Processes 173 (1998) 245–248

International Journal of Mass Spectrometry and Ion Processes

Subject index

Ab initio calculations
The nature of $C_{10}H_2^+$ in mass spectra of polynuclear aromatic hydrocarbons 27
Absolute cross sections
Collisional dissociation of H_3^+ ions on Kr 17
AFM
Atomic force microscopy study of sputter-induced topography on silver-coated silicon by a defocused beam of argon neutrals 99
Angular distributions
Collisional dissociation of H_3^+ ions on Kr 17
Appearance energy
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Avogadro constant
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55

Breath analysis
On-line monitoring of volatile organic compounds at pptv levels by means of Proton-Transfer-Reaction Mass spectrometry (PTR-MS). Medical applications, food control and environmental research 191

Carbon–nitrogen clusters
Mass spectrometry studies of carbon–nitrogen cluster anions produced by laser ablation. Mass distribution and collision induced dissociation 71
CF_3H cluster ions
Chemical reactions in CF_3H cluster ions 153
Chemical reactions
Chemical reactions in CF_3H cluster ions 153
Clusters
Structures and energies of C_nSi^+ ($4 \leq n \leq 15$) silicon carbide clusters 41
UV laser multiphoton ionization–dissociation of phenylsilane and its homogeneous dimers 143
Collision activated dissociation (CAD)
The nature of $C_{10}H_2^+$ in mass spectra of polynuclear aromatic hydrocarbons 27
Collision excitation
Collision-induced electronic excitation of NH^+ ions studied by optical spectroscopy 127
Collision induced dissociation
Collisional dissociation of H_3^+ ions on Kr 17
Mass spectrometry studies of carbon–nitrogen cluster anions produced by laser ablation. Mass distribution and collision induced dissociation 71
Computations
Structures and energies of C_nSi^+ ($4 \leq n \leq 15$) silicon carbide clusters 41
Computer simulations
Investigation of the ion movement in open ICR cells with computer simulations 81

Density functional theory
Structures and energies of C_nSi^+ ($4 \leq n \leq 15$) silicon carbide clusters 41
Density functional theory (DFT) calculations
The nature of $C_{10}H_2^+$ in mass spectra of polynuclear aromatic hydrocarbons 27

Electron affinity
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Electron capture
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Electronic excitation
Collision-induced electronic excitation of NH^+ ions studied by optical spectroscopy 127
Electrostatic energy analyser
On the transmission function of an ion-energy and mass spectrometer 91

Fluorinated fullerenes
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Fragmentation
UV laser multiphoton ionization–dissociation of phenylsilane and its homogeneous dimers 143
Fragmentation mechanisms
Collisional dissociation of H_3^+ ions on Kr 17
Fullerenes
Resonant free electron capture spectra of $C_{60}F_{48}$ 113

Gas isotope mass spectrometry
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55

H_2^+
Collisional dissociation of H_3^+ ions on Kr 17
H_3^+
Collisional dissociation of H_3^+ ions on Kr 17
H^+ desorption
Energy distribution of H^+ ions desorbed from metal surfaces by MeV ion impact 1
H^+ energy distribution
Energy distribution of H^+ ions desorbed from metal surfaces by MeV ion impact 1
Henry's constants
On-line monitoring of volatile organic compounds at pptv levels by means of Proton-Transfer-Reaction Mass spectrometry (PTR-MS). Medical applications, food control and environmental research 191

Intracluster reactions
UV laser multiphoton ionization–dissociation of phenylsilane and its homogeneous dimers 143
Ion fragmentation energies
Collisional dissociation of H_3^+ ions on Kr 17
Ion mobility spectrometry
Studies on gas-phase positive ion–molecule reactions of relevance to ion mobility spectrometry. The reactions of 2-methyl-2-propanol (t-butyl alcohol) with protonated water clusters in an ion mobility system 65
Ion–molecule reactions
Studies on gas-phase positive ion–molecule reactions of relevance to ion mobility spectrometry. The reactions of 2-methyl-2-propanol (t-butyl alcohol) with protonated water clusters in an ion mobility system 65
Ion trap
Observation of high-order motional resonances of an ion cloud in a Paul trap 107
Ionization
UV laser multiphoton ionization–dissociation of phenylsilane and its homogeneous dimers 143
Isotope amount ratios
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55
Isotope ratio
Determination of $^6Li/^7Li$ isotope ratio using two photon resonance three photon resonance ionisation mass spectrometry 177
High-precision determination of osmium and rhenium isotope ratios by in situ oxygen isotope ratio correction using negative thermal ionization mass spectrometry 163
Isotopic composition
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55
Isotopic selectivity
Determination of $^6Li/^7Li$ isotope ratio using two photon resonance three photon resonance ionisation mass spectrometry 177

Laser ablation
Mass spectrometry studies of carbon–nitrogen cluster anions produced by laser ablation. Mass distribution and collision induced dissociation 71
Lithium
Determination of $^6Li/^7Li$ isotope ratio using two photon resonance three photon resonance ionisation mass spectrometry 177

Mass distribution
Mass spectrometry studies of carbon–nitrogen cluster anions produced by laser ablation. Mass distribution and collision induced dissociation 71
Mass spectrometer
On the transmission function of an ion-energy and mass spectrometer 91
Mass spectrometry of negative ions
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Mean lifetime
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Metastable decay
Chemical reactions in CF_3H cluster ions 153
Motional resonance
Observation of high-order motional resonances of an ion cloud in a Paul trap 107

Negative thermal ionization mass spectrometry
High-precision determination of osmium and rhenium isotope ratios by in situ oxygen isotope ratio correction using negative thermal ionization mass spectrometry 163

On-line monitoring
On-line monitoring of volatile organic compounds at pptv levels by means of Proton-Transfer-Reaction Mass spectrometry (PTR-MS). Medical applications, food control and environmental research 191

Open ICR cell
Investigation of the ion movement in open ICR cells with computer simulations 81
Optical spectroscopy
Collision-induced electronic excitation of NH^+ ions studied by optical spectroscopy 127
Osmium
High-precision determination of osmium and rhenium isotope ratios by in situ oxygen isotope ratio correction using negative thermal ionization mass spectrometry 163
Oxygen
High-precision determination of osmium and rhenium isotope ratios by in situ oxygen isotope ratio correction using negative thermal ionization mass spectrometry 163

Paul trap
Observation of high-order motional resonances of an ion cloud in a Paul trap 107
PDMS
Energy distribution of H^+ ions desorbed from metal surfaces by MeV ion impact 1
Phenylsilane
UV laser multiphoton ionization–dissociation of phenylsilane and its homogeneous dimers 143
Plasmons
Resonant free electron capture spectra of $C_{60}F_{48}$ 113
Polynuclear aromatic hydrocarbons (PAHs)
The nature of $C_{10}H_2^+$ in mass spectra of polynuclear aromatic hydrocarbons 27
Primary isotopic gas standard
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55
Proton-Transfer-Reaction Mass spectrometer
On-line monitoring of volatile organic compounds at pptv levels by means of Proton-Transfer-Reaction Mass spectrometry (PTR-MS). Medical applications, food control and environmental research 191
Protonated water clusters
Studies on gas-phase positive ion–molecule reactions of relevance to ion mobility spectrometry. The reactions of 2-methyl-2-propanol (t-butyl alcohol) with protonated water clusters in an ion mobility system 65

Resonance ionisation mass spectrometry
Determination of $^6Li/^7Li$ isotope ratio using two photon resonance three photon resonance ionisation mass spectrometry 177
Rhenium
High-precision determination of osmium and rhenium isotope ratios by in situ oxygen isotope ratio correction using negative thermal ionization mass spectrometry 163

SI
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55
Silicon
Atomic force microscopy study of sputter-induced topography on silver-coated silicon by a defocused beam of argon neutrals 99
SIMS
Atomic force microscopy study of sputter-induced topography on silver-coated silicon by a defocused beam of argon neutrals 99
Surface roughness
Atomic force microscopy study of sputter-induced topography on silver-coated silicon by a defocused beam of argon neutrals 99

t-Butyl alcohol
Studies on gas-phase positive ion–molecule reactions of relevance to ion mobility spectrometry. The reactions of 2-methyl-2-propanol (t-butyl alcohol) with protonated water clusters in an ion mobility system 65
Theoretical calculations
Determination of $^6Li/^7Li$ isotope ratio using two photon resonance three photon resonance ionisation mass spectrometry 177
Time-of-flight
Energy distribution of H^+ ions desorbed from metal surfaces by MeV ion impact 1
Traceability
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55
Translational energy spectroscopy
Collisional dissociation of H_3^+ ions on Kr 17
Transmission function
On the transmission function of an ion-energy and mass spectrometer 91
Trapping geometry
Investigation of the ion movement in open ICR cells with computer simulations 81
Tropospheric trace constituents
On-line monitoring of volatile organic compounds at pptv levels by means of Proton-Transfer-Reaction Mass spectrometry (PTR-MS). Medical applications, food control and environmental research 191

VOC emissions
On-line monitoring of volatile organic compounds at pptv levels by means of Proton-Transfer-Reaction Mass spectrometry (PTR-MS). Medical applications, food control and environmental research 191

Xenon
A primary xenon isotopic gas standard with SI traceable values for isotopic composition and molar mass 55
